The need for advocacy by families often springs from a vision of what the family want to eventuate for their child's future and barriers that exist that may inhibit this vision.

Families are most likely to take up the role of advocacy for their family member with disability over the long term and act in the person's best interests.

Family Advocacy is an independent and impartial advocacy organisation that works with families across NSW to promote and defend the rights and interests of people who have developmental disability*

We are managed and staffed by parents and allies of people with disability who recognise the issues families face and who can assist in strengthening the advocacy of families.

**Developmental disability is a disability that occurs in the developmental period of a person's life (in the period from conception to adulthood) and includes intellectual disability, cerebral palsy, spina bifida, autism, and any combination of physical, intellectual or sensory disability.*
